

Technical Specification | Hangers

Metal Hangers

Part no: BBJ 2 - B6492 / BBJ 3 - B6493
BBJ 4 - B6494

Dimensions:

- BBJ 2 approx pipe size
3/8" liquid 5/8" gas
allowing for insulation
- BBJ 3 approx pipe size
1/2" liquid 7/8" gas
allowing for insulation
- BBJ 4 approx pipe size
5/8" liquid 1 1/8" gas
allowing for insulation

Bag quantity: 10

Benefits:

- For use on 8mm or 10mm
thread rods
- Quick and easy pipe installation
- Avoids the need for cable trays
- Use in area's that are fire sensitive
- Suitable for internal or external
use within the temperature
range of -40°C to 200°C

Materials of construction:

- Pressing to: FePO4 (CRI) to
BSEN 10130:1999
- Finish zinc plated and colour
passivated. Minimum thickness
8 microns
- Maximum load 25kg (all sizes)

BBJ Hangers are used to support pipe work hanging from ceilings. They hold both liquid and gas lines.

They fit on both M8 and M10 size studding, saving time when supporting pipe work or condensate lines.

They are adjusted by simply twisting them up or down the rod. They need to be installed every 6ft, and using Hangers means that you no longer need to hang cable trays.
