POWERHUBB MATRIX EV CHARGER

powerhubb

Powerhubb is one of the UK's leading EV charging providers offering reliable, efficient charging solutions for electric vehicles (EVs).

Offering a comprehensive range of charging stations, developed to meet the demand of the entire market, from small domestic settings through to all scales of commercial installation.

Powerhubb also understand and recognise the impacts of fossil fuels on climate change, the immediate and long term effects on the environment is necessary to tackle global warming.

It is these facts that has inspired Powerhubb to find alternative solutions to the reliance of fossil fuels for transport, and have pledged to plant a new tree with the sale of each charger to combat excess levels of carbon dioxide and the releasing of oxygen into the atmosphere.
